

X - O N E

FEATURES:

1. Cowhide leather is widely used in work gloves due to its natural durability, abrasion resistance, and comfortability.
2. Double leather padded palm gives an additional layer of protection and durability to the palm of your hand.
3. Extended safety cuff provides added protection to the users wrist while facilitating easy on and off access.
4. Wing thumb design provides increased flexibility without sacrificing comfort.
5. The cowhide leather knuckle guard and fingertips offers impact protection and durability in high wear areas.
6. Canvas backing is very lightweight and breathable for added comfort.
7. Gunn cut pattern features one seam at the base of the two middle fingers offering maximum comfort.
